WORK EXPERIENCE

Infocap AI

November 2024 – Present

Agentic Automation Engineer

Remote (Washington DC)

- Designed and delivered technical Proof of Concept (PoCs) for clients across the government and enterprise sectors, using AWS, Power Platform, and UiPath to support pre-sales and solution architecture efforts.
- Support of our largest client as Lead Developer and Solution Architect for AWS Connect related solutions.
- Developed internal automation and integration systems for Infocap team using AWS platform. Built phone system for team using AWS services (Connect, Lambda, and DynamoDB).
- Other projects and duties as assigned.

Exelon

October 2023 – November 2024

Sr. Services Analyst

Remote (Oak Brook, IL)

- Responsible for the architecture and development of automations using UiPath, Microsoft Power Automate and Power Apps, and HP Operations Orchestration. Worked across teams with analysts and stakeholders to ensure release schedules were met.
 - Managed automation pods of developers for special projects within finance teams.
 - Aided in requirements gathering, maintenance and support of automations, and user education around automation.

Slalom Consulting

August 2022 – September 2023

Consultant

Remote (Chicago, IL)

- Specialized in Intelligent Process Automation consulting for businesses using UiPath and Power Automate platforms. Developed and deployed automations through the entire project lifecycle using Agile methodologies.
 - Conducted interviews with stakeholders at multiple organizational levels to identify and select processes for automation.
- Provided training to Fortune 500 clients and internal teams on automation development, CoE practices, and emerging automation technologies.
